

EasyDent CD Update Instructions

- ☐ If you are prompted to Overwrite Files. Reply “A” for all each time you are prompted.

Update Checklist

- __1 Back up EasyDent system ----- THIS IS **EXTREMELY IMPORTANT**.
- __2 Exit **all** running programs, even if you have to **Restart** your computer.
- __3 Insert the Update CD (**label up**) into your computer.
- __4 With-in approximately 1 minute you should be prompted with a **Menu**.
If not then do the following:
 - Open you're My Computer icon or Computer from the Start Menu.
 - Locate the EasyDent update CD; double-click on it, to open it.
 - Next, double-click on the **Runnow** file.
- __5 Select the **RED** “**Main Computer Update**” button, even if you aren't sitting at your main computer. Read and follow the on screen instructions.
(If you see an “**Abort, Retry, Fail**” message, then restart your computer, don't start EasyDent, and use the CD again, please. Another option is to reply “F”.)
- __6 Remove the Update CD when the update is complete.
- __7 At each work station, Login to EasyDent again. You will be prompted to update your work station, follow on screen instructions and your work station will be updated from the server.

You only need to use the CD once.
