Electronic Prescription Mandates

More states have mandated electronic prescribing of controlled substances (EPCS) starting in 2021. We recommend one of the following solutions:

1) EasyDent's built-in eScripts service; this is \$420/year paid to Data Tec plus \$150/year to NewCropRx for sending controlled substances. These fees are for each Dentist. The advantage to this option is that our system automatically carries over patient demographics (Name, Address, DOB, etc.) to the eScripts system.

2) Veradigm ePrescribe which currently appears to be \$33/month per prescriber. The advantage is this is less expensive, although the patient's demographics aren't automatically carried over. EasyDent brings up a small window that makes it easier to copy over the patient's demographics; it still must be done manually. Data Tec is not affiliated with Veradigm.
